

## Hand-held Search Light HID Spot

The **hand-held searchlight HID Spot** is used with its 4 ° optics primarily for screening of places of accident. The pistol grip lies ergonomically in the hand and provides an optimal handling of the searchlight. Equipped with a xenon-gas discharging bulb the lamp guarantees a high light output (up to 4-times higher in relation to halogen bulbs with comparatively similar burn time). Because the bulb has no filament it is extremely insusceptible to shocks.

### **Technical data:**

Bulb	:	50 W D2S HID Xenon-Light
Energy source	:	extern, 12 V oder 24 V
Body	:	Aluminium with pistol grip
Dimensions	:	Ø 109 mm x 160 mm
Weight	:	2.600 g
Colour	:	black
Lens	:	hardened glass (heat resistant)
Pressure	:	IP67 charging socket
Beam angle	:	ca. 4°

Basic variant 12-24V:      magnetic ON/OFF switch  
                                          car plug

### **Optional accessories:**

Vehicle transport recording  
 Transport case - shock resistant and water tight  
 C16 plug 12/24V vehicle plug
