

## Emergency Light Case Kit

Photo with optionally accessories

The **Emergency Light Case Kit** is developed for the immediate intervention on the scenes. At the scene of the accident first responders must quickly make the right decisions. Since it is important to keep track - even at night time and in bad weather. Good views and a reliable lighting facilitate the work of rescue workers and save lives. The xenon work light provides about two hours of light. However, it can also be converted as a searchlight and operated on any vehicle. The electronics automatically adjusts to the respective voltage of 12 or 24V.

### **Technical data:**

Burntime	:	>2 hours
Bulb	:	50W D2S HID Xenon-Light
Colour temperature	:	similar day light (4500 Kelvin)
Output	:	90 Lumen per Watt = 5000 lms
compared to halogen bulb:	:	18 lm/W=630lms
Technique	:	magnetic On/Off-switch, LED display showing battery capacity, SMD power MOS-FET technique, deep discharge protection, quick ignition
	:	Handle, Wide range input 12-24V
	:	Standard Tripod mount with adjustable joint
	:	Incl. Transport case
Battery source	:	rechargeable battery 12V / 13 Ah NiMH
Charger	:	automatic charger
Charging time	:	6 h
Body	:	Aluminium
Dimensions case	:	570 mm x 470 mm x 200mm
Weight	:	11.900 g incl. Case, accessories
Colour	:	black
Lens	:	hardened glass (heat resistant)
Pressure	:	Ip65
Beam angle	:	ca. 70°

### **Accessories - options:**

Interchangeable lens Spot 4°  
Standard Tripod mount with adjustable joint  
Power cable 4m with car plug
